All about the rainforests ③

By Aimee Taylor

The Rainforest rains a lot, it is a <u>rain</u>forest! But it is very warm for certain animals.

Some animals like Toucans Frogs And snakes are reptiles that live in the rainforest

Some animals like Jaguars Monkeys Lions Are the wild animals that live in the rainforest

The rainforest has loads of different layers: .The Emergent Layer .The Canopy Layer .The Understory .The Forest Floor

And another:

The rainforest song by David Williams. Just click on the video!
